#### GENERAL NOTES.

One of the amusing peculiarities of

GENTEAL NOTES.

One of the animaling peculiarities of the game of hose ball. There has noted the game of hose ball. There has not found him upon the grand stand, just back of he earther, where he could study to the best possible advantage the selemtific the earther, where he could study to the best possible advantage the selemtific the such an enthiusiast in the game that he sure in the sure of the such an enthiusiast in the game that he sure in the sure of the sure and the sure of the s

the devil's gravestone as a momento. An engine that will pull a short train without flame, smoke, grease, or noise is precisely what is needed on elevated railways. Such an engine Colonel Beaumont, an English engineer,

The great quantities of sweetmeats sent for sale by England to the South African colonies are said to have robbed the young ladies of their teeth. is said to have invented. Air is stored in a reservoir under a pressure of 1,000 pounds to the square inch, and delivered thence, first, into a small, and afterward into larger cylinders, whence, after giving out its force, it passes into the outer air. An old difficulty, that compressed air freezes the atmosphere, which condenses on the joints of the engines, has been overcome; and the engines, has been overcome; and the engine of the county, far away from the traveled roads.

There is a young woman nineteen years old in Trinity county, California, who has never seen a wagon; yet she is accomplished, being a good housekeeper, writer, singer and conversationalist. She is not blind, but lives in the lower part of the county, far away from the traveled roads.

A "Banjo club" has been formed by gine can now haul a gross load of 22 tons for 11 miles, or 12 tons for 20 miles with one charge of air. This promises to dispose of all trouble about flame, smoke, grease, or coal dropping, foul smells or other nuisances which have been so much complained of, and to make the elevated road of the future a much more tolerable thing than the elevated road of the past. It is anticipated in London that the new engine will for certain functions supersede not onlyisteam, but horses-that it will be applied, that is to say, to carriages traversing common roads-which expectation, if realized, may bring about a wonderful revolution in the methods and economies of our daily lives.

### Interesting Facts.

Professor Playfair says: "If I only bend my arm, or move my finger, there is a certain portion of the tissue destroyed, which must be supplied by my food; the more work a man performs, the more of these nitrogenous subtances he requires. The other class of tood serves s very important, but quite different purpose-supplying animal heat. The temperature of our bodies is, in temperate climates, at least, higher than the surrounding air, and in order to keep up this temperature, a combustion goes on similar to that of an ordinary fire. The same products-carbonic acid, water and ammonia-are evolved from the mouth of the furnace of the body, and the mouth of a common chimney. In cold weather a certain portion of heat is gradually extracted from our body, which must be supplied by the combustion of our food or of the matter of our bodies; the colder the climate, therefore, the more heat-giving

### FOR THE PAIR SEX.

Fashions of the Day.

are made up in combination with fine News and Notes for Women.

part of the county, far away from the traveled roads.

A "Banjo club" has been formed by prominent young ladies of Washington, several of whom have become very good players on the instrument. The ladies all prefer the banjo to the guitar, and some of them have pet instruments inlaid with mother-of-pearl and ornamented with silver, with daintily embroidered cases.

It is said that wrinkles are painted out of faces by a process now coming into use. The coloring, whether white or pink, is moistened with fine, thin shellac varnish. Then the wrinkled parts of the skin are colored and held at a sufficient tension to smooth out the wrinkles. The varnish penetrates and stiffens the skin in drying and a smooth surface is left. A bottle of shellac is among the toilet articles of many New York women, it is claimed, and some of them have acquired a wonderful degree of skill in using it. The drawback is that it soon cracks, roughens and is hard to remove. A renewal is needed every day, and the result must be permanently injurious to the skin.

In doctoring black comb, nothing acts nearer like a clarm than iodine, touching the spots with it; and as you can make it much cheaper than to buy, I will add the proportions in preparing it, viz., Iodine, one ounce; alcohol, one pint; potassa-iodine, one drachm.

Should your fowls show signs of influenza, bronchial affection, or hard breathing, for they are subject to colds the same as mankind have ready some turpentine, and with the secondary feather of the wing make a brush by pulling off the side feathers, leaving a nice bunch on the end. (These feathers I always save when my poultry is dreesed for market.) Dip the brush in the turpentine, open the beak, run it down the throat, turning it sideways and draw it through the cut in the roof of the mouth, lay the head back and use freely on the outside of the throat. In health it is necessary for a fowl to have warm feet and legs. Should they feel cold to the touch anoint with turpentine. When applying these remedies you must use judgment, as I cannot see my patient.—Mrs. L. E. McMahas, in Procinc Rural Press.

A man who passed through many

mate, therefore, the more heat-giving must be the food."

Consumption Cured

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure for Consumption, Bronchitis, Catarrh, Asthma and all Throat and Lung Affections, also a positive and radical cure for Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering feltows. Actuated by this motive and a desire to relieve human suffering, I will send free of charge to all who desire it, this recipe, in German, French or Engish, with full directions for preparing and using. Sent by mail by addressing with stamp, naming this paper, Sherar, 149 Powers' Block, Rochester, 27e-o-w.

DR. N. G. WHITE'S PULMONARY ELIXIE. Coughs, Colds, Croup, Asthma, Whooping Cough, And other Lung Affections.

The astonishing auccess of this Elixir, and the unparalloled sale, are sufficient evidence of as superiority over all other remedies of the

kind, for Lung and Throat Affections.

Good News for the Ladies. Every woman who has saved rages for the past three years has justly complained of the low price that have ruled in the barter trade but issue seems to have opened a new era in prices, and it now pays as well as it ever has to save excepthing in this line. Unless the present tariff is medified with so as to flood the United States with the plague infested rage of foreign countries and thus oring the price lower than they ever have been, there is a good prospect that fair prices will be sustained for all grades of rage. I am now paying 33% per cant higher for thom than at April I. Bear this in mind and also that everything that accumulates in the shape of cotton and weeden rages and paper except rag carpets and straw paper, is sainble. Mix and save all together and wait for ene of my pedding trans, of which I have three this season, and I will guarantee you a product of rubbers are worth twice last year's price, and

ISPAVIN CURE

Rev. P. N. GRANGER.

Presiding Etder of the St. Albans District.

DH. S. J. KENDALL & CO., GENTS:—In reply to your letter I will say that my experience with Kendall's Spavin Cure has been very satisfactory indeed. Three or four years ago I procursed a bottle of your agent, and with it cured a horse of lamoness caused by spavin. Last season my horse became very lame and I turned him out for a few weeks when he became better, but when I put him on the road he grew worse, when I discovered that a ringtione was forming. I procured a bottle of Kendall's Spavin Cure and with less than a bottle cured him so that he is not lame, neither can the bunch be found.

Respectfully yours, \*\* \*\* \*\*P. N. GRANGER.\*\*

Job Printing Perseverance Will Tell.

Stoughton, Mass., March 16, 1880.

B. J. Kendall & Co., GENTS:—In justice to you and mysolf, I think I ought to let you know that I have removed two Bonk SPAVINS with Kendall's Spavin Cure, one very large one. Don't know how long the spavin had been there. I have owned the horse six months. It took me four months to take the large one off, and two months for the small one. I have used 10 bottles. The horse is entirely well, not at all stift, and no bunch to be seen or felt. This is a wonderful medicine. It is a new thing here, but if it does for all what it has done for me its sale will be very great.

Respectfully yours, CHAS. E. PARKER.

Kendall's Spavin Cure.

MEMBRITH VILLAGE, N. II. Peb. 17, 1879
DR. B. J. KENDALL & CO.—Dear Sirs:—The horse I used your Spavin Cure on had a splint as large as a ken's egg and had been there about a year, and kept growing larger. I used one bettle of your Spavin Cure on it, which took it nearly all off, so that the leg was as amoothe as the other. It is worth \$100 to me and I therefore feel very grateful to you. Please send me one half doz. of your Spavin Cure "C. U. D." Youre with respect.

JOHN C. TOWLE.

WOODSTOCK VALLEY, CONK., Dec. 2, 1879.
B. J. KENDALL & CO.—Gentlemen:—In the spring of 1871 I bought a horse quite lame with a spavin. After using I bottle of "Kendall's Spavin Cure" his lameness was gone and the bunch re-reveet. He has been worked ever since in a heavy team, but with no return of the lameness. Since that time I have used dozens of bottles with good success, taking from one to three bottles to effect a cure. I take pleasure in recommending it.

good success, taking from one to three bottles to effect a cure. I take pleasure in recommending it as I believe it is the best horse liniment extant. Yours respectfully, A. W. BANCROFF.

CONCORD, N. H., January 2, 1886.

B. J. KENDALL & CO.—Gentlemen:—We have a beautiful roan mare that was given to us on account of a spavin on her leg which made her dead lause. We look off her shees and allowed her torus in the barn yard in the fall of the year, applying "Kendall's Spavin Cure" according to directions. We did, not use her for a month. She was easirely cured, and the bunch completely removed and has never been lame since. We state what we know to be a fact, We have sold 12 dozen tottles in the short time that we have acted as your agonts in Concord. our agents in Concord. tespecially, UNDERHILL & KITTREDGE

KENDALL'S

SPAVIN CURE ON HUMAN FLESH.

PATTEN'S MILLS, WASHINGTON CO., N. Y. Fels.31, 1878.

B. J. KENDALL, M. D.—Dear Sir:—The particular case which I used your "Spavin Cure" was a malignant ankle sprain of sixteen month's standing. I had tried many things, but in vain. Your "Spavin Cure" put the foot to the ground, and for the first time since hurt, in a natural position. For a family liniment it excels anything we ever used. Yours truly, REV. M. P. RELI., Pastor M. E. Church, Patten's Mills, N. Y.

BARRESPIELD, VT., Doc. 23, 1879.

B. J. KENDALL & CO.—Gents.—I wish to add my testimony in favor of your invaluable imment "Rendall's Spavin Cure." In the spring of 1822, I slipped on the ice and sprained my right limb at the knee joint. I was very lame and, at times, anflored the most extractability pain. I were a headage on it for over a year, and tried most everything in my reach, but could fain nothing that would give me permanent rollef. When I overworked, if would pain me very much. In April, 1879, I began to think I should be a cripple for life, but, having some of "Kendall's Spavin Cure," thought I would try it. I used one third of a bottle and experienced rehef at once. The pain left me and has not troubled me since. I feel very grateful to you, and would recommend "Kendall's Spavin Cure" to all who suffer from sprains or rheumatism. Tours truly, MRS. J. BOUTELL.

FOR CATTLE.

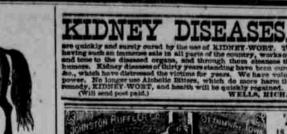

WADDINGTON, N. Y., Jan. 5, 1880.

B. J. KENDALL & CO.—Gentlemen >—"Kendall's Spavin Cure" I consider as a truly beneficial remody for the removal of spavins and any other enlargement, on all snimals as well as horses. I had a very flue Jorey hofter which lost one fourth (\*2) of her bag with garget, and remande i so until soming in the second flue, when we applied your "Kendall's Spavin Cure," rubbing it theroughly, and effected a complete cure. Believing it has no rival as a liniment, I cheerfully recomment its use. Yours etc., WALTER RUTHER FOILD.

Importer and breeder of fancy cattle, Stock Farm, Waddington, N. Y.

Is sure in its effects, mild in its action, ac it does not blister, and yot it is penetrating and powerful to reach any deep scated pain or to remove any bony growth, or any other enlargement, if used for several days, such as spavins, spilints, curis, callous, sprains, swelings, any lameness and all enlargements of the limbs, or rheumatism in man and for any purpose for which a liminent is used for man or beast. It is now known to be the best liminent for man ever used, acting mild and yet certain in its effects. It is used full strongth and with perfect safety at all seasons of the year.

Hair Vigor, FOR RESTORING GRAY HAIR TO ITS

NATURAL VITALITY AND COLOR. It is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray. light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the bair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The Vigor cleanses the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair The Vigor is incomparable. It is colorless, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and unsurpassed in its excellence.

Prepared by Dr. J. C. Ayer & Co., Practical and Analytical Chemists, Lowell, Mass.
